Letter of Recommendation

To whom so Ever it May Concern

It is my great pleasure to write this recommendation letter for my bright BSc student **Mr Abel Malu**. I know him personally as a sincere, dedicated, and hardworking professional in computing sciences. I had ample opportunities to assess his knowledge and performance during BSc studies in Computer Science. I have taught him two courses (i.e., Data structure and algorithm, & Design and Analysis of Algorithm).

He is a dedicated, trustworthy technocrat and shares ideas openly to accomplish the assigned tasks cohesively. Mr Abel has an inspiring record of having in-depth knowledge of Computer Science, especially in the domain of Algorithm design and development.

I have noted a great maturity in the knowledge of projects and technical skills. He is not only a young technocrat but a dynamic educator in his field of specialization. He has excelled in a number of computer subjects. I am highly impressed with his wide range of expertise on topics and keenness for applying them to solving Computer Science problems in the real world. I had many occasions to discuss and supervise techno-academic issues together and discovered a matured and innovative personality in him.

I believe that if he gets a chance for the job or a scholarship he applied for, I am sure; he will contribute the best of his potential for the betterment of your organization and project goals.

Therefore i vehemently recommend him to any prestigious organization like yours for Jobs or Scholarships and also wish her the best of luck in future endeavors. If you have further queries or any clarification, I would be happy to furnish such information in the future as well.

Thanking you

Sincerely,

Yitayish Lema

Lecturer, Faculty of computing and software engineering
